

## BBE – The Business Exchange for the Life Sciences 2009

### SAVE THE DATE 9 December 2009

You are invited to join us, UK Trade & Investment (UKTI), at our popular **International Business Development and Partnering event** in London. This event coincides with the **Genesis Conference** taking place on 10-11 December.

Last year 17 countries from Australasia, Asia, Europe, Africa and America were represented.

This year, responding to your feedback, we're making a few exciting changes – we will have a number of Commercial Officers from around the globe who will be available for **one-to-one meetings** for you to explore possibilities to access international markets. They will accompany international delegations of highly targeted companies who will also be available for meetings.

#### What has the government ever done for us?

In addition, we will have UKTI Life Science specialists from the central and regional teams who will be able to give you in-depth knowledge of the UKTI products, services, and business development from their sectors and markets right across the Life Science spectrum.

#### Real Help for Real Businesses

We will also be running our **hugely popular** government support area, which will include representatives of a number of government agencies that provide grant and business advice as well as financing, IP and a host of other targeted support services – **all in one room at the same time!**

#### The best Christmas gift for your company

The website will be up very shortly and places will be secured with a small refundable deposit for those attending on the day. Places will be **limited**, so when we open for registration we strongly advise **early booking** to ensure your place for what we are certain will be our best ever BBE.
